

SMILE Activity details 2019

Voluntary / Charity Programmes:

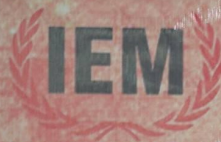

Institute of Engineering & Management has decided to create an Institutional Social Responsibility Committee for supporting the disadvantaged and deprived parts of the society and spread smiles. **The committee formed by the college is named S.M.I.L.E.: Students Mending Individual Lives Everywhere.** We plan to visit orphanages, conduct events for the children, interact with them and make them smile. We want to be of some help to them by donating in kind or monetary donations as the need be. **The following two events have been undertaken by us in the previous year 2019.**

Thalassemia Awareness and Test Camp

On 4th April 2019, SMILE in association with NRS Hospital conducted their first Thalassemia Awareness and Test Camp at IEM Ashram Campus. Participants were shown presentations regarding awareness against Thalassemia and were also given a chance for a free medical test. The camp was a huge success.

The poster is a red square with a white border. At the top left is the logo of NRS Medical College, featuring a lamp and the text 'NRS MEDICAL COLLEGE'. At the top center is the IEM logo, which includes the text 'IEM' in a laurel wreath, 'Institute of Engineering & Management', and the motto 'Good Education, Good Jobs'. At the top right is the SMILE logo, showing three stylized figures holding hands, with the text 'SMILE' and 'Students Mending Individual Lives Everywhere' below it. In the center is a large white teardrop shape containing a circle of white silhouettes of people holding hands. At the bottom, the text reads: 'Thalassemia Awareness Camp', 'Organised by S.M.I.L.E in collaboration with NRS College and Hospital', 'VENUE- IEM Ashram Building, Kolkata', and 'DATE - 4th April, 2019'.

I.E.M ASHRAM
CAMPUS

A venture to go green, think green and grow green.

On 5th November, 2019, the students of IEM ashram campus took the initiative of planting a sapling in Ashram campus. This small step to portray the importance of plants in our daily life, this small move to not let the leaves leave us, this long term investment, will indeed bring a S.M.I.L.E sometime in the near future.
