

Organized by
Department of Information Technology
in association with HRDC, IEM

Objective of the FDP

The Faculty Development Program, "Exploring Data Horizons: Application in Data Science," seeks to elevate participants' expertise by providing a deep dive into data science principles, tools, and emerging trends. Focused on skill enhancement, the program imparts hands-on training in data analysis, machine learning, and visualization. Its objective is to enable faculty members to seamlessly integrate data science concepts into their teaching methodologies, adapt to industry trends, and foster interdisciplinary collaboration. The program also aims to cultivate a community of practice, stimulate research, enhance curricula, and ensure quality assurance, ultimately empowering educators to excel in delivering relevant and innovative data science education.
