1. Introduction

There is a proliferation of academic institutions of higher learning in the country. The diverse nature of these institutions poses tremendous challenges for the Promoters as well as UGC and academic regulators like AICTE to control them effectively from both academic and administrative points of view. In today's digital era it is possible to fulfill this need through an Academic ERP that is flexible, scalable, and provides a platform for progressive modular development consistent with the stage of development of a particular institution.

2. About the company

3. Proposed Solution – Academic ERP

3.1. About “Academic ERP”

Academic ERP is an important step towards e-governance, transparency and quality improvement in the domain of academic administration. Many of the reputed institutions in the country are using some form of ‘Academic ERP’ with full satisfaction.

The concept of Academic ERP, aims not only at achieving operational excellence in Institutions, but also make its stakeholders the beneficiaries of the system.

The Academic ERP takes care of the following stakeholders from the institution's point of view:

- i) Students/Parents
- ii) Teachers
- iii) Promoters
- iv) Regulatory Agencies (AICTE, NAAC, NBA)

3.5. Why “Academic ERP”?

When embarking on an ERP projects, higher education's risk-averse nature and close-knit community encourage CIOs to look toward the software and systems used by peer organizations that have successfully tackled similar challenges. Higher education executive teams do not naively believe that it was just the technology that made those organizations successful. However, they feel that, by adopting the technologies that others have been successful with, they are removing one variable from the success/failure equation. And our Academic ERP solution has been successfully rolled out and adopted in many of the institutes and currently has more than 5000+ users and as such offers a proven and tested solution.

Hosted on Amazon Cloud infrastructure, it would allow to get started with minimum investment and invest more as one scales up and it provides a best in class security features and can be accessed in any part of the globe at any time (24X7) with highest level security features.

3.6. Our value offerings

Following are couple of engagement models available:

1. Full Implementation services:

As part of this model, we partner with the institutes to make the ERP functional to the institute. It would include:

- a. Hosting, setup and configuration of Academic ERP
- b. Data conversion
- c. Training (both end user as well as technology know how transition)
- d. Support application customization
- e. Warranty support post go-live

2. Software License and consulting services:

As part of this model, we will help to implement the Academic ERP to your organization.
