Syllabus and Lesson Plan for BCA Admission Batch 2024

Subject Name: **Introduction to Machine Learning**

Credit: 4

Lecture Hours: 40

Subject Code: **BCACC501**

Pre-requisite: Basics knowledge of python programming

Maximum: 100 marks (Internal: 30 marks; External: 70 marks)

List of Faculty Members handling the Subject –

1. Dr. Rajendrani Mukherjee
2. Prof. Raimoni Hansda

Relevant Links:

[NPTEL](#)

COURSE OBJECTIVES:

Throughout the course, students will be expected to demonstrate their understanding of Machine Learning concepts and algorithms by being able to do each of the following:

1. To apply fundamental concepts of Python Programming & sklearn library for problem solving
2. To understand the fundamentals of different ML algorithms along with their parameters.
3. To understand and apply and work with pandas dataframe ,numpy sklearn
4. To apply logical reasoning to design programs using ML models using python modules and packages.

COURSE OUTCOMES:

CO1: Understand the importance and basic concepts of Python Programming & sklearn library for problem solving.

CO2: To understand basic concepts of different supervised learning algorithms.

CO3: To get familiarize and understand basic concepts of different unsupervised learning algorithms.

CO4: Understand some basic properties of Preprocessing of Data.

Module No	Topic	Sub Topic	Chapter Name and Book	Mapping with Industry and International Academia	Lecture Hours	Corresponding Lab Assignment
Module 1	Introduction to Machine Learning	Introduction to human and machine learning, application of ML, Tools of ML, Types of ML	Machine Learning, Chapter 1, Saikat Dutta, Subramanian Chandramouli, Amit Kr. Das	<i>International Academia:</i> https://openlearninglibrary.mit.edu/courses/course-v1:MITx+6.036+1T2019/courseware/Week1/intro_ml/?activate_block_id=block-v1%3AMITx%2B6.0	10	Basic python programs using Numpy package and implementation of SciPy ,matplotlib ,pandas packages for data preprocessing as well as data visualization
	Preparing Model	ML activities, Data types, data preprocessing	Machine Learning, Chapter 2, Saikat Dutta, Subramanian			

			Chandramouli, Amit Kr. Das	36%2B1T2019%2Btype%40sequential%2Bblock%40intro_ml/		
	Model Evolution	Model selection, Model Training, Model Representation, Performance Evolution	Machine Learning, Chapter 3, Saikat Dutta, Subramanian Chandramouli, Amit Kr. Das	Industry Mapping: TensorFlow PyTorch: scikit-learn: NumPy and) ,Pandas		
	Jupyter Notebook and packages installation process to run ML programs	Why Python? scikit-learn, Installing scikit-learn ,Essential Libraries and Tools , Jupyter Notebook NumPy ,SciPy , matplotlib ,pandas,mglearn,	Study Materials			
Module 2	Supervised Learning-1: Classification	Introduction to Supervised Learning and Its application, Introduction to classification, Classification model evolution.	Machine Learning, Chapter 7, Saikat Dutta, Subramanian Chandramouli, Amit Kr. Das	International Academia: https://openlearninglibrary.mit.edu/courses/course-v1:MITx+6.036+1T2019/courseware/Week1/intro_ml/?activate_block_id=block-v1%3AMITx%2B6.036%2B1T2019%2Btype%40sequential%2Bblock%40intro_ml/	10	1. Programming for problem solving using k-NN 2. Programming for problem solving using Decision tree 3. Programming for problem solving using k-NN 4. Programming for problem solving using Support vector machine
	Types of Classification	Various Model: k-NN, Decision tree, Random forest, Support vector machine	Machine Learning, Chapter 7, Saikat Dutta, Subramanian Chandramouli, Amit Kr. Das			

				scikit-learn: NumPy and) ,Pandas		
Module 3	Supervised Learning-2: Regression	Introduction to Regression, Difference between classification and regression, Application of regression, model evolution.	Machine Learning, Chapter 8, Saikat Dutta, Subramanian Chandramouli, Amit Kr. Das	International Academia: https://openlearninglibrary.mit.edu/courses/course-v1:MITx+6.036+1T2019/courseware/Week1/intro_ml/?activate_block_id=block-v1%3AMITx%2B6.036%2B1T2019%2Btype%40sequential%2Bblock%40intro_ml/ Industry Mapping: TensorFlow PyTorch: scikit-learn: NumPy and) ,Pandas	10	1. Programming for problem solving using linear regression 2. Programming for problem solving using multiple regression 3. Programming for problem solving using polynomial regression 4. Programming for problem solving using logistic regression
	Types of Regression	Simple and multiple linear regression, Polynomial regression, Logistic regression, Maximum Likelihood Estimation	Machine Learning, Chapter 8, Saikat Dutta, Subramanian Chandramouli, Amit Kr. Das			
Module 4	Unsupervised Learning-1: Introduction	Introduction to unsupervised learning, Supervised Vs. Unsupervised Learning, Application of Unsupervised learning,	Machine Learning, Chapter 9, Saikat Dutta, Subramanian Chandramouli, Amit Kr. Das	International Academia: https://openlearninglibrary.mit.edu/courses/course-v1:MITx+6.036+1T2019/courseware/Week1/intro_ml/?activate_block_id=block-v1%3AMITx%2B6.036%2B1T2019%2Btype%40sequential%2Bblock%40intro_ml/	6	1. Programming for problem solving using k-Means Clustering 2. Program based on association rule
	Unsupervised Learning-2: Types of unsupervised learning	Clustering, Different types of clustering, k-Means Clustering, Association rule, apriori algorithm	Machine Learning, Chapter 9, Saikat Dutta, Subramanian Chandramouli, Amit Kr. Das			

				pe%40sequential%2Bblock%40intro_ml/ Industry Mapping: TensorFlow PyTorch: scikit-learn: NumPy and Pandas		
Module 5	Basic concept of Neural Network	Introduction to ANN, Implementation of ANN, Activation Function, Backpropagation	Machine Learning, Chapter 11, Saikat Dutta, Subramanian Chandramouli, Amit Kr. Das	International Academia: https://openlearninglibrary.mit.edu/courses/course-v1:MITx+6.036+1T2019/courseware/Week6/neural_networks/?activate_block_id=block-v1%3AMITx%2B6.036%2B1T2019%2Btype%40sequential%2Bblock%40neural_networks Industry Mapping: TensorFlow PyTorch: scikit-learn: NumPy and Pandas	4	1. Programming for problem solving using Neural Networks

Detailed Lesson Plan:

Module 1: Introduction to Machine Learning

Working Day	Lesson Plan Description
Day 1	Introduction to Machine learning, Human learning vs. Machine learning
Day 2	Application, advantages of Machine Learning
Day 3	Tools Used for Machine Learning
Day 4	Types of Machine Learning
Day 5	Data preprocessing concept
Day 6	Model selection, Model Training
Day 7	Model Representation, Performance Evolution
Day 8	Jupyter note book installation process
Day 9	Basic package installation to run ML program
Day 10	Implementation of NumPy ,SciPy ,and matplotlib packages

Module 2: Supervised Learning-1: Classification

Working Day	Lesson Plan Description
Day 11	Introduction to Supervised Learning

Day 12	Real life application of supervised learning
Day 13	Advantages of supervised learning
Day 14	Introduction to classification
Day 15	Classification model evolution
Day 16	k-NN
Day 17	Decision tree
Day 18	Random forest
Day 19	Support vector machine
Day 20	Various model comparison

Module 3: Supervised Learning-2: Regression

Working Day	Lesson Plan Description
Day 21	Introduction to regression
Day 22	Classification vs. Regression
Day 23	Real life application of regression
Day 24	Simple linear regression
Day 25	Multiple linear regression
Day 26	Regression analysis
Day 27	Polynomial regression
Day 28	Logistic regression
Day 29	Maximum Likelihood Estimation
Day 30	Problem solving based on regression

Module 4: Unsupervised Learning

Working Day	Lesson Plan Description
Day 31	Introduction to unsupervised learning, Supervised Vs. Unsupervised Learning
Day 32	Real life application of unsupervised learning to solve problem
Day 33	Introduction to clustering, Types of clustering
Day 34	K-means clustering, Hierarchical clustering
Day 35	Association Rule
Day 36	Apriori Algorithm

Module 5: Basic concept of Neural Network

Working Day	Lesson Plan Description
Day 37	Introduction to ANN
Day 38	Implementation of ANN
Day 39	Activation Function
Day 40	Backpropagation

PSO	PSO Description
PSO1	Technical Knowledge and Problem-Solving: Apply fundamental concepts of computer applications, programming languages, data structures, algorithms, and database management to analyse and solve computational problems effectively.
PSO2	Software Design and Development: Demonstrate the ability to design, develop, test, and deploy software solutions by utilizing modern tools, technologies, and logical programming skills for real-world applications across domains such as web, mobile, and enterprise systems.
PSO3	Professional Skills and Ethics: Exhibit effective communication, teamwork, leadership, and ethical practices while adapting to emerging IT trends, thereby contributing responsibly to societal and organizational development.

QUESTION PAPER PATTERN AND DATES:

EXAMINATION	Dates	PART – A	PART – B	PART – C	TOTAL MARKS
Mid Term 1	September 7, 2026 - September 11, 2026	Attempt 5 out of 10 questions; Each question carries 2 marks (2×5)	Attempt 2 out of 4 questions; Each question carries 5 marks (5×2)	Attempt 1 out of 2 questions; Each question carries 10 marks (10×1)	30
Mid Term 2	October 30, 2026 - November 5, 2026	Attempt 5 out of 10 questions; Each question carries 2 marks (2×5)	Attempt 2 out of 4 questions; Each question carries 5 marks (5×2)	Attempt 1 out of 2 questions; Each question carries 10 marks (10×1)	30
End Semester Examination	November 30, 2026 - December 16, 2026	Attempt 10 out of 15 questions; Each question carries 2 marks (2×10)	Attempt 6 out of 9 questions; Each question carries 5 marks (5×6)	Attempt 5 out of 8 questions; Each question carries 10 marks (10×5)	100

[NPTEL](#)

COURSE OBJECTIVES:

Throughout the course, students will be expected to demonstrate their understanding of Software Engineering by being able to do each of the following:

1. To introduce the students to a branch of study associated with the development of a software product.
2. To gain basic knowledge about the pre-requisites for planning a software project.
3. To learn how to design of software.
4. To enable the students to perform testing of a software.

COURSE OUTCOMES:

CO1: Identify software requirements for manual or automated real-world systems

CO2: Compare and contrast software process models and software development methodologies.

CO3: Illustrate the software requirement specification, and system design.

CO4: Develop ability to critically analyze and evaluate a variety of management practices in the contemporary context.

Module No	Topic	Sub Topic	Chapter Name and Book	Mapping with Industry and International Academia	Lecture Hours
Module 1	Fundamentals of Software Engineering	Evolution—From an Art Form to an Engineering Discipline, Software Development Projects, Exploratory Style of Software Development, Emergence of Software Engineering, Notable Changes in Software	Chapter 1, 2 Fundamentals of Software Engineering by Rajib Mall	https://ocw.mit.edu/courses/1-124j-foundations-of-software-engineering-fall-2000/	8

Module No	Topic	Sub Topic	Chapter Name and Book	Mapping with Industry and International Academia	Lecture Hours
		Development Practices, Computer Systems Engineering, A Few Basic Concepts, Waterfall Model and its Extensions, Rapid Application Development (RAD), Agile Development Models, Spiral Model, A Comparison of Different Life Cycle Models			
Module 2	Software Project Management	Software Project Management Complexities, Responsibilities of a Software Project Manager, Project Planning, Metrics for Project Size Estimation, Project Estimation Techniques, Empirical Estimation Techniques, COCOMO—A Heuristic Estimation Technique, Staffing Level	Chapter 3, 4 Fundamentals of Software Engineering by Rajib Mall	https://ocw.mit.edu/courses/1-040-project-management-spring-2004/	8

Module No	Topic	Sub Topic	Chapter Name and Book	Mapping with Industry and International Academia	Lecture Hours
		Estimation, Scheduling, Organisation and Team Structures, Risk Management, Software Configuration Management, Requirements Gathering and Analysis, Software Requirements Specification (SRS)			
Module 3	Software Design	Overview of the Design Process, How to Characterise a Good Software Design?, Cohesion and Coupling, Layered Arrangement of Modules, Approaches to Software Design, Overview of SA/SD Methodology, Structured Analysis, Developing the DFD Model of a System,	Chapter 5, 6 Fundamentals of Software Engineering by Rajib Mall	https://www.udemy.com/topic/software-design/?srsltid=AfmBOorLQmirtD4-oe4-eJGh928qyndbv_fqMKfE_CnRm1dwB2RRJpli	8

Module No	Topic	Sub Topic	Chapter Name and Book	Mapping with Industry and International Academia	Lecture Hours
		Structured Design, Detailed Design, Design Review			
Module 4	Software Reliability and Quality Management	Software Reliability, Statistical Testing, Software Quality, Software Quality Management System, ISO 9000, SEI Capability Maturity Model, Few Other Important Quality Standards, Six Sigma, Characteristics of Software Maintenance, Software Maintenance Process Models, Estimation of Maintenance Cost	Chapter 11, 13 Fundamentals of Software Engineering by Rajib Mall	https://extendedstudies.ucsd.edu/courses/managing-software-quality-assurance-and-testing-cse-41265	8
Module 5	Advanced Software Engineering Methods and Practices	Halstead's Software Science—An Analytical Technique, Staffing Formal System Specification, Axiomatic Specification, Algebraic Specification, Executable Specification and 4GL	Chapter 3, 4, 6, 13 Fundamentals of Software Engineering by Rajib Mall Chapter 13 Software Engineering A Practitioner's Approach by Roger S. Pressman (6th Edition) Chapter 8	https://www.mit.edu/~6.005/fa14/classes/03-testing-and-code-review/	8

Module No	Topic	Sub Topic	Chapter Name and Book	Mapping with Industry and International Academia	Lecture Hours
		Software Reverse Engineering, Testing Strategies: A strategic approach to test strategies for conventional software, black-box and white-box testing, unit testing, validation testing, system testing	Software Engineering by Ian Sommerville (9th Edition)		

Detailed Lesson Plan:

3rd Year, Sec A (Faculty Name – Prof. Pradipta Roy, Prof. Mohit Das)

3rd Year, Sec B (Faculty Name – Prof. Pradipta Roy, Prof. Mohit Das)

3rd Year, Sec C (Faculty Name – Prof. Pradipta Roy, Prof. Mohit Das)

Module 1: Fundamentals of Software Engineering

Working Day	Lesson Plan Description
Day 1	Evolution—From an Art Form to an Engineering Discipline
Day 2	Software Development Projects, Exploratory Style of Software Development
Day 3	Emergence of Software Engineering, Notable Changes in Software Development Practices
Day 4	Computer Systems Engineering, A Few Basic Concepts
Day 5	Waterfall Model and its Extensions
Day 6	Rapid Application Development (RAD)
Day 7	Agile Development Models

Working Day	Lesson Plan Description
Day 8	Spiral Model, A Comparison of Different Life Cycle Models.

Module 2: Software Project Management

Working Day	Lesson Plan Description
Day 9	Software Project Management Complexities
Day 10	Responsibilities of a Software Project Manager, Project Planning
Day 11	Metrics for Project Size Estimation, Project Estimation Techniques
Day 12	Empirical Estimation Techniques
Day 13	COCOMO—A Heuristic Estimation Technique
Day 14	Organisation and Team Structures, Staffing, Risk Management
Day 15	Software Configuration Management
Day 16	Requirements Gathering and Analysis, Software Requirements Specification (SRS)

Module 3: Software Design

Working Day	Lesson Plan Description
Day 17	Overview of the Design Process
Day 18	How to Characterise a Good Software Design?
Day 19	Cohesion and Coupling
Day 20	Layered Arrangement of Modules
Day 21	Approaches to Software Design, Overview of SA/SD Methodology
Day 22	Structured Analysis, Developing the DFD Model of a System
Day 23	Structured Design
Day 24	Detailed Design, Design Review.

Module 4: Software Reliability and Quality Management

Working Day	Lesson Plan Description
Day 25	Software Reliability
Day 26	Statistical Testing
Day 27	Software Quality, Software Quality Management System, ISO 9000
Day 28	SEI Capability Maturity Model
Day 29	Few Other Important Quality Standards, Six Sigma
Day 30	Characteristics of Software Maintenance
Day 31	Software Maintenance Process Models
Day 32	Estimation of Maintenance Cost.

Module 5: Advanced Software Engineering Methods and Practices

Working Day	Lesson Plan Description
Day 33	Halstead's Software Science—An Analytical Technique
Day 34	Staffing level estimation
Day 35	Formal System Specification
Day 36	Axiomatic Specification, Algebraic Specification
Day 37	Executable Specification and 4GL
Day 38	Software Reverse Engineering
Day 39	Testing Strategies: A strategic approach to test strategies for conventional software, Black-box and white-box testing
Day 40	Unit testing, validation testing, system testing

4. Link for LinkedIn Learning Course:

<https://www.linkedin.com/learning/search?keywords=Cloud%20Computing&u=229219690>

COURSE OBJECTIVES:

1. Understand the principles of cloud computing.
2. Understanding SaaS, PaaS etc.
3. To gain knowledge of applications of cloud computing.
4. To understand cloud computing platforms.

COURSE OUTCOMES:

CO1: Understand the fundamentals and foundations of Cloud Computing.

CO 2 Idea about the main concepts, key technologies, strengths, and limitations of cloud computing and the possible applications for state-of-the-art cloud computing.

CO 3: Understand the key concepts of virtualization and use of hypervisors, explain the core issues of cloud computing such as security, privacy, etc.

CO 4: Gain knowledge about the different Cloud computing services and cloud service providers, Gain knowledge about cloud servers and cloud storage technologies, relevant distributed file systems, NoSQL databases and object storage.

Module No	Topic	Sub Topic	Chapter Name and Book	Mapping with Industry and International Academia	Lecture Hours
Module 1:	Introduction	Cloud Computing at a Glance, The Vision of Cloud Computing, Defining a Cloud , Cloud Computing Reference Model , Characteristics and Benefits, Distributed Systems, Virtualization, Web 2.0 , Service Oriented Computing, Utility Oriented Computing, Eras of Computing, Parallel vs Distributed Computing , Elements of Parallel Computing , , Hardware Architectures of Parallel Processing , Approaches to Parallel Programming , Levels of Parallelism , Laws of Caution , Elements of Distributed Computing , Architectural Styles for Distributed Computing , Models for Inter Process Communication , Technologies for Distributed Computing , Remote Procedure Call , Distributed Object Framework , Service Oriented Computing	Mastering Cloud Computing : Foundations and Application Programming (Buyya, Vecciola and Selvi), Chapter 1, Introduction , Chapter 4: Cloud Computing Architecture	<i>International Academia:</i> https://aws.amazon.com/free/ <i>Industry Mapping:</i> Aneka	08

Module 2:	Virtualization	Characteristics of Virtualized Environments, Execution Virtualization, Other types of Virtualization, Virtualization and Cloud Computing, Pros and Cons of Virtualization, IAAS, PAAS, SAAS Types of Clouds, and Security	Mastering Cloud Computing: Foundations and Application Programming (Buyya, Vecciola and Selvi), Chapter 2 : Principles of Parallel and Distributed Computing, Chapter 3: Virtualization	International Academia: https://aws.amazon.com/free/ Industry Mapping: Aneka	08
Module 3:	Principles of Parallel and Distributed Computing	Concurrent Computing with Thread Programming, High-throughput Computing and Data-Intensive Computing, Programming applications with Threads, Thread API, Parallel computation with Threads, Task computing, Task Computation with High-Throughput, Task Introduction, Frameworks for Task computing, Task-based application model, Data-intensive computing Characteristics	Mastering Cloud Computing : Foundations and Application Programming (Buyya, Vecciola and Selvi), Chapter 6: Concurrent Computing, Chapter 7 High-Throughput Computing, Chapter 8: Data-Intensive Computing	International Academia: https://aws.amazon.com/free/ Industry Mapping: Aneka	08
Module 4:	Edge, Fog computing and application of cloud of computing	Edge computing, Fog computing, Cloud Platforms and Applications, Overview on Amazon Web Services (AWS), Overview of Google Cloud Platform (GCP), Overview of Microsoft Azure Cloud, Cloud applications in scientific, business and consumer domain	Mastering Cloud Computing : Foundations and Application Programming (Buyya, Vecciola and Selvi), Chapter 9: Cloud Platforms in Industry	International Academia: https://aws.amazon.com/free/ Industry Mapping: Aneka	08

Module 5:	Advanced Cloud Computing: Architecture, Virtualization, and Application Models	• Advanced Architectures: Hardware Architectures of Parallel Processing, Laws of Caution, and Architectural Styles for Distributed Computing. • Advanced Virtualization & Frameworks: Execution Virtualization, Complex Cloud Security, and Distributed Object Frameworks. • Advanced Computational Models: High-throughput Computing, Data-Intensive Computing Characteristics, and Frameworks for Task computing. • Advanced Deployments: Edge computing, Fog computing, and complex Cloud applications in scientific and business domains.	Mastering Cloud Computing: Foundations and Application Programming (Buyya, Vecciola and Selvi) – Advanced topics review from Chapters 2, 3, 4, 6, 7, 8, and 9.	International Academia: https://aws.amazon.com/free/ Industry Mapping: Aneka, AWS, GCP, Azure	08
------------------	---	--	--	---	----

Module 1: Introduction:

3rd Year, Sec A (Faculty Name – Prof. Kaustav Nandy)

Working Day	Lesson Plan Description
Day 1	Cloud Computing at a Glance & The Vision of Cloud Computing.
Day 2	Defining a Cloud & Cloud Computing Reference Model.
Day 3	Characteristics, Benefits, Distributed Systems, & Web 2.0.
Day 4	Service Oriented Computing & Utility Oriented Computing.
Day 5	Eras of Computing & Parallel vs Distributed Computing.
Day 6	Elements of Parallel Computing & Approaches to Parallel Programming.
Day 7	Levels of Parallelism & Elements of Distributed Computing.
Day 8	Models for Inter Process Communication & Remote Procedure Call.

Module 2: Virtualization:

3rd Year, Sec A (Faculty Name – Prof. Kaustav Nandy)

Working Day	Lesson Plan Description
Day 9	Characteristics of Virtualized Environments.
Day 10	Other types of Virtualization & Virtualization and Cloud Computing.
Day 11	Pros and Cons of Virtualization.
Day 12	IAAS (Infrastructure as a Service)
Day 13	PAAS (Platform as a Service)
Day 14	SAAS (Software as a Service)
Day 15	Types of Clouds
Day 16	Baseline Security in Cloud Environments.

Module 3: Principles of Parallel and Distributed Computing:

3rd Year, Sec A (Faculty Name – Prof. Kaustav Nandy)

Working Day	Lesson Plan Description
Day 17	Concurrent Computing with Thread Programming
Day 18	Programming applications with Threads
Day 19	Thread API
Day 20	Parallel computation with Threads
Day 21	Task computing & Task Introduction
Day 22	Data-intensive computing basics
Day 23	Technologies for Distributed Computing
Day 24	Service Oriented Computing (Implementation)

Module 4: Edge, Fog computing and application of cloud of computing

3rd Year, Sec A (Faculty Name- Prof. Kaustav Nandy)

Working Day	Lesson Plan Description
Day 25	Cloud Platforms and Applications Overview
Day 26	Overview on Amazon Web Services (AWS) - Part 1
Day 27	Overview on Amazon Web Services (AWS) - Part 2
Day 28	Overview of Google Cloud Platform (GCP)
Day 29	Overview of Microsoft Azure Cloud - Part 1
Day 30	Overview of Microsoft Azure Cloud - Part 2
Day 31	Cloud applications in the consumer domain
Day 32	Comparative analysis of AWS, GCP, and Azure platforms

Module 5: Advanced Cloud Computing: Architecture, Virtualization, and Application Models

3rd Year, Sec A (Faculty Name- Prof. Kaustav Nandy)

Working Day	Lesson Plan Description
Day 33	Deep Dive: Hardware Architectures of Parallel Processing & Laws of Caution
Day 34	Advanced Architecture: Architectural Styles for Distributed Computing & Distributed Object Frameworks
Day 35	Advanced Virtualization: Execution Virtualization & complex Cloud Security implementations
Day 36	Advanced Computational Models: High-throughput Computing
Day 38	Advanced Computational Models: Data-Intensive Computing Characteristics
Day 39	Complex Task Management: Frameworks for Task computing & Task-based application models
Day 40	Enterprise & Scientific Applications: Complex Cloud applications in scientific and business domains

TEXT BOOK:

1. “Mastering Cloud Computing: Foundations and Application Programming (Buyya, Vecciola and Selvi)”, (Module-1, Module- 2, Module-3, Module- 4)

REFERENCE BOOKS:

1. “Cloud Computing”, Aravind Doss Second Edition, Tata McGraw Hill.

PSO	PSO Description
PSO1	Technical Knowledge and Problem-Solving: Apply fundamental concepts of computer applications, programming languages, data structures, algorithms, and database management to analyse and solve computational problems effectively.
PSO2	Software Design and Development: Demonstrate the ability to design, develop, test, and deploy software solutions by utilizing modern tools, technologies, and logical programming skills for real-world applications across domains such as web, mobile, and enterprise systems.
PSO3	Professional Skills and Ethics: Exhibit effective communication, teamwork, leadership, and ethical practices while adapting to emerging IT trends, thereby contributing responsibly to societal and organizational development.

QUESTION PAPER PATTERN AND DATES

EXAMINATION	Dates	PART – A	PART – B	PART – C	TOTAL MARKS
Mid Term 1	September 7, 2026- September 11, 2026	Attempt 5 out of 10 questions; Each question carries 2 marks (2 × 5)	Attempt 2 out of 4 questions; Each question carries 5 marks (5 × 2)	Attempt 1 out of 2 questions; Each question carries 10 marks (10 × 1)	30
Mid Term 2	October 30, 2026- November 5, 2026	Attempt 5 out of 10 questions; Each question carries 2 marks (2 × 5)	Attempt 2 out of 4 questions; Each question carries 5 marks (5 × 2)	Attempt 1 out of 2 questions; Each question carries 10 marks (10 × 1)	30
End Semester Examination	November 30, 2026- December 16, 2026	Attempt 10 out of 15 questions; Each question carries 2 marks (2 × 10)	Attempt 6 out of 9 questions; Each question carries 5 marks (5 × 6)	Attempt 5 out of 8 questions; Each question carries 10 marks (10 × 5)	100

Syllabus and Lesson Plan for BCA Admission Batch 2024

Subject Name: **Cyber Security**
Subject Code: **BCACS503**

Credit: 4

Lecture Hours: 40

Maximum: 100 marks (Internal: 30 marks; External: 70 marks)

List of Faculty Members handling the Subject –

1. Sucheta Chandra

Pre-requisite: Knowledge of basic data communication and network security.

Relevant Links:

1. **Link for Study Material:** [StudyMatCyberSecuritySC_MS.docx - Google Docs](#)
2. **Link for Coursera Course:**
[Google Cybersecurity Professional Certificate | Coursera](#)
3. **Link for LinkedIn Learning Course:**
[Understanding the cybersecurity frameworks and standards - Cybersecurity Foundations Video Tutorial | LinkedIn Learning, formerly Lynda.com](#)
4. **NPTEL Course:**
[Cyber Security and Privacy - Course](#)

COURSE OBJECTIVES:

Throughout the course, students will be expected to understand the concept of Cyber Security by :

1. Developing an overall understanding of defending data in cyberspace
2. Developing an understanding of different protocols, cyber crimes, cyber laws and vulnerabilities in digital world.
3. Developing an understanding of how to stay secure amidst cyber threats and malware attacks.

COURSE OUTCOMES:

- CO1: Understand the various concepts of underlying computer network and probable threats
 CO2: Apply these techniques in applications to see the real-life security mechanisms in the cyber world.
 CO3: Explain the role of anti-malware programs in combating cyber threats.
 CO4: Acquire the basic knowledge of real-world hacking

Module number	Topic	Sub-topics	Chapter Name and Book	Mapping with Industry and International Academia	Lecture Hours
1	Module 1: Network Layer and Application Layer	IPv4 Addresses, IPv6 Addresses, Network layer: Delivery, Forwarding and Delivery, Delivery, forwarding, unicast routing protocols, multicast routing protocols, Remote logging, electronic mail and file transfer, Remote logging, Electronic mail, File transfer, WWW and HTTP	Fundamentals of Cyber Security By Manyank Bhusan Chapter 1,2,3	<i>International Standards:</i> Computer Networks Electrical Engineering and Computer Science MIT OpenCourseWare <i>Industry Mapping:</i> Wireshark	10
2	Module 2: Cryptography and Network Security	Cryptography, Symmetric Key cryptography, Asymmetric Key cryptography, Network Security, Security Service :Message Confidentiality, Message Integrity, Message Authentication, Digital Signature, Entity Authentication, Key Management	Book – Fundamentals of Cyber Security By Manyank Bhusan Chapter 3,4,5	<i>International Standards:</i> Cryptography and Cryptanalysis Electrical Engineering and Computer Science MIT OpenCourseWare <i>Industry Mapping:</i> NMap	8

3	Module 3: Introduction to Cyber Security	Information Security: What is Security? Why Information Security is Important? Threats to Information systems, Security Threat Source, Internal threats, External Threats, Cyber Security and Security risk analysis Application Security: Database security, E-mail Security Internet Security Security Threats Virus, Worms, Trojan Horse, Bombs, Trap Door E-mail spoofing E-mail Virus, Virus Life-Cycle, How Virus Works? Macro Viruses, Malicious Software, Network and Services Attack Denial-of-Service Attack, Types of DOS Attacks Methods of attacks.	Book – Fundamentals of Cyber Security By Manyank Bhutan Chapter 5,6	<i>International Standards:</i> Computer Systems Security Electrical Engineering and Computer Science MIT OpenCourseWare <i>Industry Mapping:</i> Bitdefender, Norton 360, McAfee, Avira	8
4	Module 4: Information Security Standards	What is ISO?, IT Act 2000 Copyright, Patent, Intellectual Property Rights Cyber Laws in India, Software Licensing	Book – Fundamentals of Cyber Security By Manyank Bhutan Chapter 8	<i>International Standards:</i> Melbourne Institute of Technology <i>Industry Mapping:</i> NMap, Advanced IP Scanner	8

5	Module 5: Ethical Hacking	Ethics Terminology, The Ethical Hacker, Security and Hacking Foundation of Security – C.A.I.A, Phases of Ethical Hacking, Hacking Technologies, Phase of Ethical Hacking: Reconnaissance, Scanning, Gaining Access Maintaining Access ,Covering Tracks, Hacker Classes: Black Hats, White Hats, Gray Hats	Book – Fundamentals of Cyber Security By Mayank Bhushan Chapter 8	International Standards: Law and Policy Social and Ethical Responsibilities of Computing (SERC) MIT OpenCourseWare Industry Mapping: Identity and Access Management, Zero Trust Architecture (ZTA)	6

Network Layer and Application Layer

3rd Year, Sec B (Faculty Name – Sucheta Chandra)

Working Days	Lesson Plan Description
Day 1	IPv4 Addresses
Day 2	IPv6 Addresses
Day 3	Network Layer: Delivery
Day 4	Network Layer: Forwarding
Day 5	Network Layer: Forwarding and Delivery
Day 6	Unicast Routing Protocols
Day 7	Multicast Routing Protocols
Day 8	Remote Logging
Day 9	Electronic Mail (Email)
Day 10	File Transfer
Day 11	World Wide Web (WWW)
Day 12	Hypertext Transfer Protocol (HTTP)

Cryptography and Network Security

3rd Year, Sec B (Faculty Name – Sucheta Chandra)

Working Days	Lesson Plan Description
Day 13	Cryptography
Day 14	Symmetric Key Cryptography
Day 15	Asymmetric Key Cryptography
Day 16	Network Security
Day 17	Security Service: Message Confidentiality
Day 18	Security Service: Message Integrity
Day 19	Security Service: Message Authentication
Day 20	Digital Signature
Day 21	Entity Authentication
Day 22	Key Management

Introduction to Cyber Security

3rd Year, Sec B (Faculty Name – Sucheta Chandra)

Working Days	Lesson Plan Description
Day 23	Information Security Overview: What is Security?
Day 24	Information Security Overview: Why Information Security is Important?
Day 25	Information Security Overview: Cyber Security terms
Day 26	Security Risk Analysis
Day 27	Application Security: Database Security
Day 28	Application Security: Email Security
Day 29	Application Security: Internet Security
Day 30	Application Security: Security Threats
Day 31	Types of Malware and Attacks
Day 32	Email Spoofing and Virus and studying about it's working and Lifecycle
Day 33	Malicious Software
Day 34	Network and Services Attacks

Information Security Standards

3rd Year, Sec B (Faculty Name – Sucheta Chandra)

Working Days	Lesson Plan Description
Day 35	Information Security Standards and Cyber Laws: What is ISO?
Day 36	Information Security Standards and Cyber Laws: IT Act 2000
Day 37	Copyright, Patent, Intellectual Property Rights , Cyber Laws in India: Software Licensing

Ethical Hacking

3rd Year, Sec B (Faculty Name – Sucheta Chandra)

Day 38	Introduction to Ethical Hacking: Ethics Terminology, The Ethical Hacker
Day 39	Security and Hacking: Foundation of Security – C.I.A.A (Confidentiality, Integrity, Availability, Authenticity)
Day 40	Phases of Ethical Hacking, Hacker Classes (Black Hats, White Hats, Gray Hats)

TEXTBOOK: 1. Fundamentals of Cyber Security, Mayank Bhushan
2. Data Communications & Networking, Behrouz A. Forouzan.

REFERENCEBOOKS:

Certified Ethical Hacker Certification Exam, William Manning.

QUESTION PAPER PATTERN AND DATES

EXAMINATION	Dates	PART – A	PART – B	PART – C	TOTAL MARKS
Mid Term 1	September 7, 2026 to September 11, 2026	Attempt 5 out of 10 questions; Each question carries 2 marks (2×5)	Attempt 2 out of 4 questions; Each question carries 5 marks (5×2)	Attempt 1 out of 2 questions; Each question carries 10 marks (10×1)	30

Mid Term 2	October 30, 2026 to November 5, 2026	Attempt 5 out of 10 questions; Each question carries 2 marks (2×5)	Attempt 2 out of 4 questions; Each question carries 5 marks (5×2)	Attempt 1 out of 2 questions; Each question carries 10 marks (10×1)	30
End Semester Examination	November 30, 2026 to December 16, 2026	Attempt 10 out of 15 questions; Each question carries 2 marks (2×10)	Attempt 6 out of 9 questions; Each question carries 5 marks (5×6)	Attempt 5 out of 8 questions; Each question carries 10 marks (10×5)	100

Syllabus and Lesson Plan for BCA Admission Batch 2024

Subject Name: **Introduction to web development
using PHP and MySQL**

Credit: 4

Lecture Hours: 40

Subject Code: **BCAWP502**

Maximum: 100 marks (Internal: 30 marks; External: 70 marks)

List of Faculty Members handling the Subject –

1. Piyali Bhanja

Pre-requisite: Basic computer programming knowledge, fundamentals of C/C++ or any programming language, basic understanding of databases, fundamentals of the internet, familiarity with code editors (VS Code/Sublime Text)

Relevant Links:

1. Link for Study Material:

https://iemcollege-my.sharepoint.com/:f/g/personal/pritam_chakraborty_iem_edu_in/EtVTTTl5MDZChd-E2eptmw4BefQBM2hoS9_PfdRxjs0btg?e=zOIHRA

2. Link for Coursera Course:

<https://www.coursera.org/specializations/web-design>

<https://www.coursera.org/learn/introduction-html-css-javascript>

<https://www.coursera.org/learn/introduction-to-front-end-development>

<https://www.coursera.org/specializations/html-css-javascript-for-web-developers>

<https://www.coursera.org/learn/packt-intro-to-php-v4qa1>

<https://www.coursera.org/projects/mysql-with-php>

3. Link for LinkedIn Learning Course:

<https://www.linkedin.com/learning/introduction-to-web-design-and-development-14628245>

<https://www.linkedin.com/learning/html-css-and-javascript-building-the-web>

<https://www.linkedin.com/learning/php-with-mysql-essential-training-2-build-a-cms>

Course Objectives:

1. To understand the fundamental concepts of web technologies, including HTML, CSS, JavaScript, and their role in web development.
2. To develop responsive and interactive web applications using modern frameworks.
3. To design server-side applications using back-end technologies.
4. To develop database-driven web applications using MySQL.

Course Outcomes:

CO1: Students will be able to understand the core concepts of web technologies, including HTML, CSS, and JavaScript, and their role in front-end development.

CO2: Students will be able to design responsive and interactive web interfaces using modern frameworks.

CO3: Students will be able to develop server-side applications using PHP.

CO4 : Students will be able to develop database driven applications using MySQL.

Module number	Topic	Sub-topics	Chapter Name and Book	Mapping with Industry and International Academia	Lecture Hours
1	Web Fundamentals	How the Internet works (HTTP/HTTPS, DNS, TCP/IP basics), Client-Server Architecture, Web Browsers and their components (rendering engines, developer tools), Web Servers overview (Apache, Nginx), Introduction to Web Hosting and Domains, Basic Networking Concepts for Web System Components, OS Services, System calls, System Programs, System Structure	Internet & World Wide Web: How to Program; P.J. Deitel, Pearson (Chapter 1) Reference: Fundamental of Web Development, Randy Connolly, Ricardo Hoar, Pearson	International Academia: (https://ocw.mit.edu/courses/6-170-software-studio-spring-2013/pages/lecture-notes/) Industry Mapping: Apache HTTP Server, NGINX, Cloudflare, Microsoft Azure	6
2	HTML, CSS & JavaScript Fundamentals	HTML5: Document structure, tags, attributes, Forms, tables, semantic elements, Multimedia embedding. CSS3: Selectors, box model, positioning Flex box and Grid layouts, Responsive design with Media Queries, CSS variables and animations. JavaScript basics (variables, operators, functions), DOM manipulation and events, form validation basics	Internet & World Wide Web: How to Program; P.J. Deitel, Pearson (Chapter 2,3,4,5,6,7,8,9,10,11,12) Reference: Fundamental of Web Development, Randy Connolly, Ricardo Hoar, Pearson	International Academia: (https://ocw.mit.edu/courses/6-170-software-studio-spring-2013/pages/lecture-notes/) Industry Mapping: HTML5, CSS3, JavaScript (ES6+), Bootstrap, GitHub, Visual Studio Code	14
3	PHP Programming Fundamentals	Features and advantages of PHP, Embedding PHP in HTML, PHP syntax and variables, Data types and operators, control structures, functions and arrays, string and date handling, form handling.	Internet & World Wide Web: How to Program; P.J. Deitel, Pearson (Chapter 18, 19) Reference: Fundamental of Web Development, Randy Connolly, Ricardo Hoar, Pearson	International Academia: (https://ocw.mit.edu/courses/6-170-software-studio-spring-2013/pages/lecture-notes/) Industry Mapping: PHP 8.x, XAMPP/LAMP/WAMP	8

			Learning PHP, MySQL & JavaScript, Robin Nixon, Pearson		
4	MySQL basics and use with PHP, Sessions and security	Introduction to MySQL (environment, creating databases and tables, data types and constraints), SQL commands and concepts. Connecting PHP with MySQL – database connectivity, executing SQL queries using PHP. Sessions in PHP, cookies and user preferences, session security basics.	Internet & World Wide Web: How to Program; P.J. Deitel, Pearson (Chapter 19) Reference: Fundamental of Web Development, Randy Connolly, Ricardo Hoar, Pearson Learning PHP, MySQL & JavaScript, Robin Nixon, Pearson	International Academia: (https://ocw.mit.edu/courses/6-170-software-studio-spring-2013/pages/lecture-notes/) Industry Mapping: PHP, MySQL, phpMyAdmin REST APIs, GitHub, Docker	8
5	Dynamic web application development and deployment	CRUD application development, debugging PHP applications. Introduction to hosting and deployment (localhost vs live server, domain and hosting basics, deploying PHP applications)	Internet & World Wide Web: How to Program; P.J. Deitel, Pearson (Chapter 19) Reference: Fundamental of Web Development, Randy Connolly, Ricardo Hoar, Pearson Learning PHP, MySQL & JavaScript, Robin Nixon, Pearson	International Academia: (https://ocw.mit.edu/courses/6-170-software-studio-spring-2013/pages/lecture-notes/) Industry Mapping: GitHub, Docker, MySQL, AWS, Microsoft Azure, Apache, NGINX, REST APIs	4

Module 1: Web Fundamentals

3rd Year, Sec C (Faculty Name – Piyali Bhanja)

Working Day	Lesson Plan Description
Day 1	Introduction to how the Internet works
Day 2	HTTP/HTTPS, DNS, TCP/IP basics
Day 3	Client-Server Architecture, Web Browsers and their components (rendering engines, developer tools)
Day 4	Web Servers overview (Apache, Nginx), Introduction to Web Hosting and Domains
Day 5	Basic Networking Concepts for Web System Components, OS Services
Day 6	System calls, System Programs, System Structure

Module 2: HTML, CSS & JavaScript Fundamentals

3rd Year, Sec C (Faculty Name – Piyali Bhanja)

Working Day	Lesson Plan Description
Day 7	HTML5: Document structure, tags, attributes
Day 8	Forms, tables, semantic elements, Multimedia embedding
Day 9	CSS3: Selectors, box model
Day 10	Positioning Flex box and Grid layouts
Day 11	Responsive design with Media Queries, CSS variables and animations
Day 12	Hands on Development of Static Website using HTML, CSS
Day 13	JavaScript basics (variables, operators, functions)
Day 14	Loop concept using JavaScript, Control Parameters (if, else, else-if)
Day 15	Introducing Function, Custom Function & Scope
Day 16	Logical Operators
Day 17	DOM manipulation and events
Day 18	DOM manipulation and events (applied practice)
Day 19	Form validation
Day 20	Review and integration practice: HTML, CSS & JavaScript

Module 3: PHP Programming Fundamentals

3rd Year, Sec C (Faculty Name – Piyali Bhanja)

Working Day	Lesson Plan Description
Day 21	Introduction to PHP, Embedding PHP in HTML
Day 22	PHP syntax and variables
Day 23	Data types and operators
Day 24	Control structures
Day 25	Functions
Day 26	Initializing and manipulating Arrays
Day 27	String processing, date handling
Day 28	Form handling and processing

Module 4: MySQL basics and use with PHP, Sessions and security

3rd Year, Sec C (Faculty Name – Piyali Bhanja)

Working Day	Lesson Plan Description
Day 29	Introduction to MySQL – setting up, Creating databases and tables in MySQL
Day 30	Data types and constraints
Day 31	SQL commands and concepts
Day 32	SQL commands and concepts (applied practice)
Day 33	Connecting PHP with MySQL – database connectivity
Day 34	Executing SQL queries using PHP
Day 35	Sessions in PHP, cookies and user preferences
Day 36	Basics of session security

Module 5: Dynamic web application development and deployment

3rd Year, Sec C (Faculty Name – Piyali Bhanja)

Working Day	Lesson Plan Description
Day 37	CRUD application development
Day 38	Debugging PHP applications
Day 39	Localhost vs live server, domain and hosting basics
Day 40	Deploying PHP applications

TEXT BOOK:

1. Internet & World Wide Web: How to Program; P.J. Deitel, Pearson
